Full Text Content

Paragraph 1: Hi, I'm Sarah — the curator behind The Signature Studio.

Paragraph 2: This space is my creative umbrella and the beginning of a long-held dream. The Signature Studio was created to blend my love for creativity, branding, and entrepreneurship — with the hope of growing into something truly special.

Paragraph 3: Right now, I curate the chicest shopping finds for women who love beautiful things: aesthetic home decor, dainty jewelry, gourmand fragrances, chic fashion pieces, and everything in between. Every product is handpicked, and I only share things I genuinely love.

Paragraph 4: But The Signature Studio is bigger than shopping finds. It's an evolving brand with three pillars: **The Edit** (curated shopping + affiliate finds), **Signature Scents** (future custom rollerball perfume experiences), and **Signature Sparkle** (future charm and permanent jewelry bar). Each branch is inspired by creativity, community, and making meaningful experiences.

Paragraph 5: My biggest dream in life is to be a mom and wife while still building something meaningful of my own — a creative business that allows flexibility, purpose, and fulfillment. The Signature Studio is how I'm making that dream real, one curated find at a time.

Closing paragraph (italic, warm brown #8B7355): *Every branch of The Signature Studio is inspired by my creative hobbies, love for marketing and design, and desire to create personal, meaningful experiences — all while supporting other entrepreneurs as they build something special of their own.*

17. SQUARESPACE-SPECIFIC SETUP TIPS

Template Choice

Use a blank template or one from the **Brine** family — they give you the most layout control and Custom CSS flexibility.

Custom CSS You'll Need

Add these in **Design > Custom CSS**:

Remove all border radius (site uses sharp corners everywhere):

```
.sqc-block, .sqc-block-content, .form-wrapper, input, button, .sqc-gallery-design-grid-slide
{
  border-radius: 0 !important;
}
```

Text selection color:

```
::selection {
  background: #F0E4DA;
  color: #3A3632;
}
```

Custom scrollbar:

```
::-webkit-scrollbar { width: 6px; }
::-webkit-scrollbar-track { background: #FAF7F2; }
::-webkit-scrollbar-thumb { background: rgba(184,169,154,0.4); border-radius: 3px; }
::-webkit-scrollbar-thumb:hover { background: #B8A99A; }
```

Hover lift effect for cards:

```
.your-card-class:hover {
  transform: translateY(-4px);
  transition: all 0.5s ease;
  box-shadow: 0 4px 20px rgba(0,0,0,0.08);
}
```

Blog Setup

- Use Squarespace's built-in **Blog** feature for "The Edit"
- Set blog layout to **Grid**, 3 columns
- Style the blog cards to match the specs in Section 8

Newsletter/Email Capture

- Use Squarespace's **Newsletter Block** or **Form Block**
- Alternatively, connect MailerLite directly via a custom form action URL
- Style the form inputs and buttons to match Section 10 specs

Navigation

- Set up pages through **Pages > Navigation**
- Use Custom CSS to achieve the uppercase, letter-spacing, and hover underline effects

- The frosted glass effect on scroll will require Custom CSS with `backdrop-filter: blur(20px)`

Font Size Notes

- The site uses very small UI text (10–12px range) for labels and tags
- Squarespace's minimum font sizes may be larger, so override with Custom CSS where needed
- Use `clamp()` in Custom CSS for responsive heading sizes

Page Structure

- Each section described above = one Squarespace **Section** or **Code Block**
- Use Squarespace's grid/column features for multi-column layouts
- For complex gradient backgrounds, use **Code Blocks** with custom HTML/CSS
